

Same Day Access

Youth Mental Health Services at Syntero

Mental health is an integral component of health and well-being. Here at Syntero, we are committed to providing high quality mental health care to youth and their families. Thank you for choosing us for your family's care needs!

How do I respond in an emergency?

*If immediate safety is not an issue,
Same Day Access is a great
resource to help stabilize a crisis.*

*If your child is experiencing a
crisis that threatens the immediate
safety of themselves and/or others,
please contact 988 or visit your
nearest emergency room.*

HOW IT WORKS

Come on in any time during our walk-in hours to meet with our next available clinician. To obtain our current hours and locations, please scan the QR code below. You can also visit <https://bit.ly/SynteroSDAhours> or call 740-428-0428.

WHAT TO EXPECT

You and your child (aged 3-18) will meet with our Same Day Access team to get immediate support and resources. Our team specializes in working with children and their families. We use a variety of creative approaches to help meet your needs.

At the conclusion of your meeting, you will leave with a scheduled follow-up meeting with our SDA team, as well as a packet of resources and tools that you can use right away.

To help us connect you with ongoing support, please bring your state ID and your child's medical insurance card, if available.

Questions?

Megan Kochheiser, MSW, LISW-S
Same Day Access Program Coordinator
